TRENDnet's 5-Port Industrial Fast Ethernet PoE+ DIN-Rail Mini Switch, model TI-PELC50, is a reliable and rugged networking solution designed for use in both extreme and demanding environments. This Industrial Fast Ethernet DIN-Rail Mini Switch features a rugged IP30 rated metal enclosure, and is designed to withstand a high degree of vibration and shock, while operating in both high and low temperatures for industrial environments within -40° – 75° C (-40° – 167° F). The hardened industrial switch features four Fast Ethernet PoE+ ports and one Fast Ethernet port for high-speed device connections. The mini-sized housing is designed to fit into most compact installation areas.

Installers and integrators can save on equipment costs and reduce installation time with TRENDnet's Industrial Fast Ethernet PoE+ Switches by delivering up to 30W per port of PoE+ power and data over existing Ethernet cables. With PoE technology, users only need one cable to deliver both data and power from the industrial unmanaged PoE+ switch. With these industrial unmanaged PoE+ switches, easily network PoE devices, such as high-power wireless access points, PTZ and other advanced IP cameras, VoIP phone systems, IPTV decoders, access controls, and more.
Fast Ethernet PoE+ Ports
Up to 200Mbps full-duplex per port and total switching capacity of 1Gbps with total power budget of 90W.
Industrial Hardened Design
Equipped with a rugged IP30 rated housing, designed to withstand a high degree of vibration and shock, and operate within an extreme temperature range of -40° – 75° C (-40° – 167° F).
